Thursday
12 September 2019

09:30am - 04:30pm
City of London

Why attend?

Digital securities are going to revitalise the way gold, diamond and other mining and exploration projects are financed.

Learn how these tools will shape your investment performance, help your clients, and make it easier for companies to raise funds.

The technology has been tried and tested for more than a decade but for some it still feels too early. How do they work? How do you trade them? Regulation? How will it change the role of bankers and Exchanges?
